Regulation regarding the use of computing and network resources of the University of Padua

Regulation

The use of computing platforms and network resources of the University of Padua is subject to specific rules of behavior which each user must comply with.

In case of non-compliance, the School of Engineering on behalf of the University of Padua reserves the right to disable account and access.

1) The use of the computing platforms devices is allowed only in compliance with the rules established by the University of Padua. The devices are connected to the GARR [1] network and therefore the use of network resources must comply with the standards issued by the GARR.

2) Each user account is strictly personal and must correspond to a single natural person, to whom the University of Padua can refer, for any technical or administrative problem resulting from the use of the account. It is forbidden to share your password to third party: in this case, the School of Engineering, on behalf of the University of Padua, will deactivate it, if used by someone other than the owner. Please note that the owner is still responsible for the improper use of the password for which he may be called to respond in the event of an offense.

3) The software, both commercial and freeware, available on the computing platforms must be used for teaching purposes only and cannot be copied or replicated on other systems.

4) Users are informed that the activities concerning the access methods (type, date and time of access; unsuccessful access attempts; attempts to obtain the privileges of system administrator or of other users) are recorded. They may be examined in the context of controls of unauthorized or illegal activities.

5) If unauthorized or illegal activities are verified, these will be sanctioned according to the regulations in force.

---

(1) The GARR Consortium manages Italian University and Research network, supporting its improvement and development, interconnecting it with all Education & Research international networks and with the commercial Internet network [https://www.ict.unipd.it/attivita/infrastruttura-e-piattaforme/reti-di-ateneo/garr].
